patentably distinct feature, "creating, by a user, a plurality of emoticons within a range of a transmittable SMS (Short Message Service) message formed by utilizing a plurality of typical characters and special characters in combination; grouping said plurality of emoticons and storing the emoticons by groups in the mobile terminal; entering an emoticon input mode; displaying a list of the stored emoticon groups; selecting an emoticon group; displaying the emoticons of an emoticon group selected by a user; storing an emoticon selected by the user with an SMS message; and wherein the emoticons are downloaded into the mobile terminal from the Internet and stored in the mobile terminal". Applicant's independent claim 10 comprises a particular combination of elements, which is neither taught nor-suggested by prior art.

Applicant's independent claim 16: The present in invention is directed to an emoticon input method in a mobile terminal, the independent claim identifies the patentably distinct feature, "creating, by a user, at least one emoticon within a range of a transmittable SMS (Short Message Service) message, which is formed by utilizing a plurality of typical characters and special characters in combination; storing the at least one emoticon in an emoticon group selected by a user among a plurality of emoticon groups comprised of previously grouped emoticons according to a specific reference; displaying a list of the plurality of emoticon groups in an emoticon input mode; displaying emoticons included in an emoticon group selected by a user among the plurality of emoticon groups; selecting, by a user, at least one emoticon from the displayed emoticons; transmitting an SMS message including the at least one emoticon selected by a user; and wherein the emoticons are downloaded into the mobile terminal

from the Internet and stored in the mobile terminal". Applicant's independent claim 16 comprises a particular combination of elements, which is neither taught nor-suggested by prior art.

Applicant's independent claim 22: The present in invention is directed to an emoticon input method in a mobile terminal, the independent claim identifies the patentably distinct feature, "displaying a list of a plurality of emoticon groups comprised of previously grouped emoticons within a range of a transmittable SMS (Short Message Service) message according to a specific reference in the emoticon input mode, wherein the emoticons are created by utilizing a plurality of typical characters and special characters in combination, and stored in the mobile terminal; displaying emoticons included in an emoticon group selected by a user among the plurality of emoticon groups; selecting, by a user, an emoticon from the displayed emoticons; storing within an SMS message the emoticon which is selected by the user; and wherein the list of a plurality of emoticon groups and the emoticons are downloaded into the mobile terminal from the Internet and stored in the mobile terminal". Applicant's independent claim 22 comprises a particular combination of elements, which is neither taught nor-suggested by prior art.
